Technology Center 2100

On October 17, 2003, the Office mailed a Restriction Requirement, requiring restriction of this application to one of three groups, which the Examiner defined as follows:

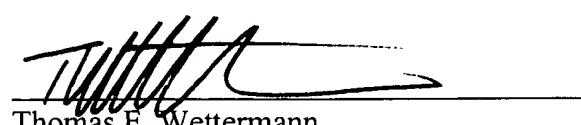

- I. Claims 1-8, drawn to creating interprocess communication data structure associated with a network address on a network device, classified in class 709, subclass 227.
- II. Claims 9 and 10, drawn to allocating a memory structure in the host computer for the socket and binding the socket to a new network address, classified in class 709, subclass 245.
- III. Claims 11-39, drawn to plurality of applications on a host computer and associating a descriptor with the socket and storing the descriptor in a protocol stack, classified in class 709, subclass 230.

In compliance with MPEP Section 818, Applicant elects Group I without prejudice. Applicant reserves the right to pursue the subject matter of Claims 9-39 in a divisional application.
